MUHAMMAD ALI TOUHEED

SENIOR ANDROID DEVELOPER

PROFESSIONAL SUMMARY

Senior Android Developer with 4+ years of experience designing and shipping production Android applications in Kotlin and Java. Delivered 5+ live apps on Google Play Store, serving users across the US, Saudi Arabia, and Pakistan. Skilled in Jetpack Compose, MVVM, Clean Architecture, Firebase, and real-time data systems. Strong track record of leading full app lifecycles from architecture design to Play Store deployment within agile, cross-functional teams.

WORK EXPERIENCE

Senior Android Developer
2021 - 2026

ASTAPOR TECHNOLOGIES | SIALKOT, PAKISTAN

- Developed and launched 5+ production Android applications on Google Play Store, achieving 4.5+ star ratings and active user bases across the US and Saudi Arabia.
- Reduced code complexity by 30% by architecting apps with MVVM and Clean Architecture, Kotlin Coroutines, and Hilt dependency injection, improving team maintainability and onboarding speed.
- Decreased order sync latency by 40% through Firebase Firestore and FCM integration, enabling real-time order tracking and push notifications across multi-role user ecosystems.
- Improved delivery route accuracy by 25% using Google Maps SDK and Directions API for live driver tracking and route optimization in logistics applications.
- Accelerated code review turnaround by 40% by establishing Git branching strategies and structured review processes, collaborating with UI, UX designers and backend engineers across 5+ projects.
- Integrated 3 third-party payment gateways, handling secure transaction flows for food ordering and logistics platforms with zero reported security incidents.

KEY PROJECTS

Big Transporter
Live on Play Store

TAXI AND LOGISTICS | CHICAGO, USA AND SAUDI ARABIA

Taxi and logistics platform serving 2 international markets (Chicago, USA and Saudi Arabia). Diagnosed and resolved 10+ critical performance bottlenecks, reducing crash rate by 35% and improving app store rating. Implemented real-time driver tracking using Google Maps SDK, cutting estimated arrival time errors by 20%.

Kotlin · Google Maps SDK · Firebase · Retrofit · MVVM

Cygnus Restaurant App
Live on Play Store

FOOD ORDERING PLATFORM

Delivered full-cycle development of an online food ordering app with 5,000+ downloads, featuring cart management, promotional codes, tip handling, and live order tracking. Built the complete application from scratch in 3 months, collaborating with a cross-functional team of 4 members.

Kotlin · Jetpack Compose · Room DB · Payment Gateway · Firebase FCM

Omda - Customer, Driver and Retailer Apps
Live on Play Store

MULTI-ROLE APP ECOSYSTEM | 3 SEPARATE APPS

Designed and built a 3-app multi-role ecosystem (Customer, Driver, Retailer) with a shared Firebase backend, supporting 1,000+ concurrent users. Achieved real-time order management and live tracking across all roles by managing state synchronization using Coroutines and LiveData, reducing data conflicts by 50%.

Kotlin · Firebase Firestore · FCM · Google Maps · Coroutines

Kiosk Self-Ordering System
Internal Deployment

RESTAURANT KIOSK APPLICATION

Developed a tablet-based self-service kiosk application supporting 3 user roles, cutting average order processing time by 45% through real-time order routing to the kitchen and Firebase integration for live menu updates.

Kotlin · Firebase · Room DB · MVVM

EDUCATION

BS Computer Science
University of Gujrat
2016 - 2020

TECHNICAL SKILLS

Core Languages
Kotlin · Java

Architecture and UI
Jetpack Compose · MVVM · Clean Architecture · LiveData · XML Layouts · Material Design

Backend and APIs
Firebase · FCM · Retrofit · Coroutines · Google Maps SDK · REST APIs · OkHttp

Data and Tools
Room DB · Git · ML Kit · Payment APIs · Hilt DI · Android Studio · Play Store

Cross-Platform (Learning)
React Native · JavaScript

LANGUAGES

- English — Professional
- Urdu — Native
